NOTE: Please tick if you would like to get information about the software and updates once a month via e-mail. You can also get a free copy of this software and software updates by subscribing to our RSS Feed or through Email Subscription. With the new version of iTunes, the computer is used as a media player, music library, and a backup tool for media files. As a part of the Macintosh update, the application has been updated to run more smoothly. iTunes 10.0.2 is available for free for all registered Mac users. The updated iTunes has tons of new features including: Social networking integration With the integration of Twitter and Facebook, you can now see which of your friends already update iTunes, and you can also follow them. This feature is similar to what you see in Rhapsody. Playlists iTunes will now organize your music automatically. For example, if you play songs by a particular artist or album, or add a song to a playlist, the app can organize your music based on your interests. More audio formats You can now get all your music in the new iPod compatible formats from your iTunes music library. These include AAC, a higher-quality digital audio format that improves the sound quality of your music. You can also now play your music on your iPhone or iPod touch using the USB connection on your computer. More iPod controls iTunes features customizable controls and keyboard shortcuts for browsing the music library, as well as controlling playback, browsing through your music library, and adding and deleting songs.
